Lubiseptic™

Non-Sterile Lubricating Jelly with Detergent Properties

Description:

A special artificially-perfumed lubricant having detergent properties.

Action and Uses:

Can be used as a lubricant of operator's hands and arms in obstetrical work, vaginal examinations, and rectal examinations; may be used as a lubricant for catheters, stomach tubes, etc.

For Animal Use Only

Directions:

Wet hands and arms with water and then apply Lubiseptic liberally, thoroughly covering the entire surface. When the hands and arms are contaminated with foreign matter, the first application of Lubiseptic should be massaged into the skin thoroughly and then removed with warm water. This cleanses the hands and arms. While the arms are still wet, apply another coating of Lubiseptic before beginning the examination. If additional lubrication is needed, more Lubiseptic can be applied while the arms are wet.

Note:

The skin surfaces must be free of ordinary soap to obtain all of the advantages of using Lubiseptic. In case skin irritation should develop when using this product, discontinue use.

Storage

Keep out of reach of children.

Keep from freezing
